Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages. It is the culmination of over twenty years of research and development by the authors. The Simplified Sign System has been developed and tested for ease of sign comprehension, memorization, and formation by limiting the complexity of the motor skills required to form each sign, and by ensuring that each sign visually resembles the meaning it conveys. Volume 1 outlines the research underpinning and informing the project, and places the Simplified Sign System in a wider context of sign usage, historically and by different populations. Volume 2 presents the lexicon of signs, totalling approximately 1000 signs, each with a clear illustration and a written description of how the sign is formed, as well as a memory aid that connects the sign visually to the meaning that it conveys. While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities, cerebral palsy, autism, or aphasia, it may also assist the communication needs of a wider audience – such as healthcare professionals, aid workers, military personnel, travellers or parents, and children who have not yet mastered spoken language. The system also has been shown to enhance learning for individuals studying a foreign language. Lucid and comprehensive, this work constitutes a valuable resource that will enhance the communicative interactions of many different people, and will be of great interest to researchers and educators alike. Author, pediatrician, and developmental-behavioral expert Dan Shapiro, MD, divides his new parenting guide, Parent Child Journey, into ten different "miles." Each mile represents an interactive session that brings you closer to understanding your child's behavior and learning effective strategies. The first mile includes the "Gander," an assessment tool Shapiro developed to help describe your child's developmental profile—and yours too. Respecting the different learning styles of children and parents, he presents the Gander in a variety of ways: as a standard rating scale with explanatory text, but also as a picture, a song, and a map. Then, Shapiro takes parents through nine other sessions, continuing to present his evidence-based training program as a uniquely creative integration of standard discussion, real-life vignettes, richly illustrated fable, worksheets, and homework assignments. Throughout Parent Child Journey, Shapiro emphasizes, "Just because your child's behavior may be complicated, does not mean it is incomprehensible." Parent Child Journey combines serious help with whimsical presentation—supporting and teaching parents, even as it engages and entertains. With this comprehensive new guide, Shapiro reassures parents that they are not alone on this journey.
