[Cooperative Farm Machinery Operations, 1970-80 \(Classic Reprint\)](#) Apr 18 2020 Excerpt from Cooperative Farm Machinery Operations, 1970-80 The number of farmer cooperatives franchising a full line of farm machinery declined from 101 in 1970 to 56 in 1980. Cooperative machinery sales increased from \$36 million in 1970 to \$106 million in 1980, at an average annual increase of 20 percent. Five of the 56 cooperative dealers specialized only in farm machinery sales and service in 1980. About half the total were marketing cooperatives, with the remainder about equally divided between supply and combination supply and marketing cooperatives. In 1970, supply Cooperatives represented more than half the 101 cooperative dealers. Sales of new and used machinery and repair parts increased as a percent of total farm machinery sales from 1970 to 1980, while sales of other equipment decreased as percent of the total. New machinery accounted for about 53 percent, used machinery and repair parts about 19 percent each, other equipment 4 percent, and service receipts 5 percent of total machinery sales. In 1970, new machinery accounted for about 46 percent, used machinery sales 13 percent, repair parts 15 percent, other equipment 20 percent, and service receipts 6 percent of total machinery sales. Farm machinery sales of cooperative dealers averaged 17 percent of their total cooperative sales of \$626 million in 1980. Cooperatives with machinery sales of more than \$3 million averaged about \$20 million in total sales, while cooperatives with machinery sales of less than \$1 million averaged total cooperative sales of about \$7 million.
