The Longman Academic Reading Series is a five-level series that prepares English language learners for academic work. The aim of the series is to make students more effective and confident readers by providing high-interest readings on academic subjects and by teaching them skills and strategies for effective reading, vocabulary building, note-taking, and critical thinking. The series also encourages students to discuss and write about the ideas they discovered in the readings, making them better speakers and writers of English as well. Features Readings based on academic sources -- Every reading in the text focuses on an academic subject and is chosen with the intent of providing different and intriguing perspectives on the theme. Multiple reading genres -- Readings come from a variety of sources or genres, from textbooks to on-line articles, and are written by a variety of experts from widely different fields. Explicit academic skills -- From critical reading to vocabulary building, notetaking and critical thinking, the Longman Academic Reading Series provides students with a holistic approach to effective reading. Corpus-Informed approach to vocabulary (AWL) -- Students build vocabulary and

acquire skills that will help them become more confident and successful in preparing for their academic work. Reading for Today is five-level reading skills program that systematically develops students' reading and vocabulary skills. The Reading strand focuses on the development of the reading skills students need to be successful in college. Authentic academic readings and carefully selected topics help students build general background knowledge which will be valuable in their future college studies. LANDSCAPES is a comprehensive college reading preparatory text (spanning grade levels 8-10) that takes a metacognitive approach and focuses on how the brain processes information, often referred to as brain-based learning. Since metacognition can best be understood as thinking about thinking, the text consistently presents new information with written think alouds to model the thought process involved in applying skills and strategies to reading passages. Based on the premise that the brain learns best through organization of information, the text presents the recognition of text structure and organization as a fundamental skill--one that is especially important for students who have limited prior knowledge of a subject. This focus on text structure provides a scaffold onto which developmental-level readers can apply new knowledge. Information is presented in a carefully crafted sequence that serves to build upon prior knowledge and expand understanding of skills and strategies in a recursive manner. The knowledge of how we learn, the focus of the first chapter, permeates the text and informs the selection of strategies and skills to be introduced and mastered in a specific order. In addition, learning is treated as incremental, with the reader gradually taking more responsibility with each new chapter. While each chapter emphasizes carefully selected reading skills and strategies, thematic content for each chapter establishes solid background knowledge of and interest in the subject matter. Specific and relevant study skills and vocabulary skills are integrated within each chapter as well. Taking a holistic approach to developmental reading, ENGAGE: COLLEGE READING is the third book in a 3-book series, covering reading levels grades 10-12. It guides students through a stepped and incremental approach, activating background or prior knowledge as many of the skills students need to become critical readers are skills they already possess and use on a daily basis. Often using popular media as a springboard, Dole and Taggart show students how the skills used when watching television or movies can easily transfer to their academic reading. In this third book, Engage offers a much greater emphasis on critical thinking, academic reading and reading for careers. Reviewers have lauded the inclusion of varied, interesting readings that will stimulate students' interest in reading and will

provide them with background knowledge needed for the most popular college courses. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. Q Skills for Success encourages students to think critically and succeed academically. Q's question-centred approach provides a unique critical thinking framework for each unit. This develops key cognitive skills such as analyzing, synthesizing, and evaluating - as well as developing the language skills essential for academic success. Learning outcomes are clearly stated at the start and end of the units, with competency self-evaluations and vocabulary check lists featuring the Academic Word List. This enables teachers to define learning outcomes effectively to accreditation bodies. COLLEGE READING: THE SCIENCE AND STRATEGIES OF EXPERT READERS approaches reading from a thinking skills perspective by explaining how we think, learn, and read. This expert group of authors credibly incorporates widely proven brain research and learning theory into a user-friendly dynamic reading textbook aimed at diverse learners. The bridge from the scientific research to the classroom is carefully crafted so that not only will students learn to read more efficiently, but they will also learn how to learn more efficiently. By explaining the brain science of reading, COLLEGE READING empowers students with the knowledge that they can change their brain into a more effective reading brain. COLLEGE READING teaches students how to read by providing interactive learning and reading opportunities--Making Connections, Brain Connections, Activities, Practice with a Reading Passage, Post Test, and Brain Strength Options--so that students are discovering, understanding, and remembering essential reading skills they can apply to their future coursework. All students can be naturally motivated, expert readers and learners with COLLEGE READING. Available with InfoTrac Student Collections <http://gocengage.com/infotrac>.
