Country Reports on Human Rights Practices Jan 20 2023

Theory and Practice of Model Transformations Sep 23 2020 Models have become essential for dealing with the numerous aspects involved in developing and maintaining complex IT systems. Models allow capturing of the relevant

aspects of a system from a given perspective, and at a precise level of abstraction. In addition to models, the transformations between them are other key elements in model-driven engineering. Model transformations allow the definition and implementation of the operations on models, and also provide a chain that enables the automated development of a system from its corresponding models. Furthermore, model transformations may be realized using models, and are, therefore, an integral part of any model-driven approach. There are already several proposals for model transformation specification, implementation and execution, which are beginning to be used by modeling practitioners. However, model transformations need specialized support in several aspects in order to realize their full potential. The problem goes beyond having specific languages to represent model transformations; we also need to understand their foundations, such as the key concepts and operators supporting those languages, their semantics, and their structuring mechanisms and properties (e. g. , modularity, composability and parametrization). In addition, model transformations can be stored in repositories as reusable assets, where they can be managed, discovered and reused. There is also a need to chain and combine model transformations in order to produce new and more powerful transformations, and to be able to implement new operations on models. Finally, model transformations need methodology support, i. e. , they need to be integrated into software development methodologies supported by appropriate tools and environments. These issues and concerns define the focus of these proceedings.

**Eastern Christianity and Politics in the Twenty-First Century** Aug 03 2021 This book provides an up-to-date, comprehensive overview of Eastern Christian churches in Europe, the Middle East, America, Africa, Asia and Australia. Written by leading international scholars in the field, it examines both Orthodox and Oriental churches from the end of the Cold War up to the present day. The book offers a unique insight into the myriad church-state relations in Eastern Christianity and tackles contemporary concerns, opportunities and challenges, such as religious revival after the fall of communism; churches and democracy; relations between Orthodox, Catholic and Greek Catholic churches; religious education and monastic life; the size and structure of congregations; and the impact of migration, secularisation and globalisation on Eastern Christianity in the twenty-first century.

**International Trade** Jan 16 2020 This title offers an integrated account of strategic trade analysis, combined with empirical evidence and new results. It addresses the need to synthesize and integrate the new advances in a field that has become a key element of policy discussions.

**Theorising Media and Practice** Jun 13 2022 Although practice theory has been a mainstay of social theory for nearly three decades, so far it has had very limited impact on media studies. This book draws on the work of practice theorists such

as Wittgenstein, Foucault, Bourdieu, Barth and Schatzki and rethinks the study of media from the perspective of practice theory. Drawing on ethnographic case studies from places such as Zambia, India, Hong Kong, the United States, Britain, Norway and Denmark, the contributors address a number of important themes: media as practice; the interlinkage between media, culture and practice; the contextual study of media practices; and new practices of digital production. Collectively, these chapters make a strong case for the importance of theorising the relationship between media and practice and thereby adding practice theory as a new strand to the study of anthropology of media.

**Theory and Practice of Model Transformations Oct 25 2020** This book constitutes the refereed proceedings of the 8th International Conference on Model Transformation, ICMT 2015, held in L'Aquila, Italy, in July 2015, as Part of STAF 2015, the federation of a number of the leading conferences on software technologies. The 16 revised papers were carefully selected from 34 submissions. The papers are organized in topical sections on change management; reuse and industrial applications; new paradigms for model transformation; transformation validation and verification; and foundations of model transformation.

***Energy and Water Development Appropriations for 2013: Dept. of Energy FY 2013 justifications Jan 28 2021***

**Country Reports on Human Rights Practices for 2007 Apr 30 2021 110th Congress, 2nd Session. Jacket 41-228PDF or 41-228 PDF.** The promotion of human rights is an essential piece of our foreign policy. This effort will be a global one that reaches beyond government alone. The reports in this volume will be used as a resource for shaping policy, conducting diplomacy, and arranging assistance, training, and other resource allocations. The reports will also serve as a basis for the U.S. Government's cooperation with private groups to promote the observance of internationally-recognized human rights. The Country Reports on Human Rights Practices cover internationally-recognized civil, political and worker rights, as set forth in the Universal Declaration of Human Rights. These rights include freedom from torture or other cruel, inhuman or degrading treatment or punishment; from prolonged detention without charges; from disappearance or clandestine detention; and from other flagrant violations of the right to life, liberty and the security of the person.

**Cases on Technologies for Teaching Criminology and Victimology: Methodologies and Practices Dec 07 2021** Presents state-of-the-art research and teaching into the study of corruption and those affected by it. Analyzes the benefits and disadvantages of various teaching methodologies in universities, police academies, and crime victim services.

**Advances in Intelligent Tutoring Systems Feb 09 2022** May the Forcing Functions be with You: The Stimulating World of AIED and ITS Research It is my pleasure to write the foreword for Advances in Intelligent Tutoring Systems. This

collection, with contributions from leading researchers in the field of artificial intelligence in education (AIED), constitutes an overview of the many challenging research problems that must be solved in order to build a truly intelligent tutoring system (ITS). The book not only describes some of the approaches and techniques that have been explored to meet these challenges, but also some of the systems that have actually been built and deployed in this effort. As discussed in the Introduction (Chapter 1), the terms “AIED” and “ITS” are often used interchangeably, and there is a large overlap in the researchers devoted to exploring this common field. In this foreword, I will use the term “AIED” to refer to the research area, and the term “ITS” to refer to the particular kind of system that AIED researchers build. It has often been said that AIED is “AI-complete” in that to produce a tutoring system as sophisticated and effective as a human tutor requires solving the entire gamut of artificial intelligence research (AI) problems.

**Country Reports on Human Rights Practices for 2005 Dec 19 2022**

**Vietnam Law & Legal Forum Feb 15 2020**

**Ergonomics and Nudging for Health, Safety and Happiness Mar 18 2020** This book presents the best, peer-reviewed contributions from the XII Congress of the Italian Society of Ergonomics and Human Factors (SIE), held in Lucca, Italy, on May 2-4, 2022. By highlighting the latest theories and models, as well as cutting-edge technologies and applications, and by combining findings from a range of disciplines including engineering, design, robotics, management, computer science, human biology and behavioral sciences, it provides researchers and practitioners alike with a comprehensive, timely guide on human factors and ergonomics in a variety of industrial sectors, such as health care, transportation, automotive and constructions. It also offers an excellent source of innovative ideas to stimulate future discussions and developments aimed at applying knowledge and techniques to optimize system performance, while at the same time promoting health, safety, and well-being of individuals and communities. The proceedings includes papers from researchers and practitioners, scientists and physicians, institutional leaders, managers, and policy makers that contribute to constructing the Human Factors and Ergonomics approach across a variety of methodologies, domains, and productive sectors.

**Technology Enhanced Assessment Apr 18 2020** This book constitutes the proceedings of the 20th International Conference on Technology Enhanced Assessment, TEA 2017, held in Barcelona, Spain, in October 2017. The 17 papers presented were carefully selected from 42 submissions. They are centered around topics like e-learning, computer-assisted instruction, interactive learning environments, collaborative learning, computing education, student assessment. Chapter "Student perception of scalable peer-feedback design in Massive Open Online Courses" is licensed under the terms of the Creative

**Commons Attribution 4.0 International License**

(<http://creativecommons.org/licenses/by/4.0/>). For further details see license information in the chapter.

**Governance Networks for Sustainable Cities Oct 13 2019** This book explores the effectiveness of governance networks on the design and implementation of sustainability strategies. European cities are actively developing sustainability strategies to address the impact of climate change. One recent approach many cities have taken is the creation of ‘governance networks’: groups of public, private and third sector organisations, which collaborate to support urban sustainability efforts. Drawing on two case studies in Glasgow and Copenhagen, this book explores the concept of governance networks in theory and practice, revealing how stakeholder collaboration, leadership and innovation within these networks can help or hinder the process. It also highlights the many benefits of these networks, including increased participation in the decision-making process, increased levels of resources and expertise on sustainability issues, as well as stakeholder buy-in for sustainability policies. This book provides recommendations for improving the efficiency of governance networks and will be of interest to academics and practitioners working in the areas of urban governance and sustainability.

**Country Reports on Human Rights Practices for 2006 Oct 17 2022**

**Annual Report on International Religious Freedom 2005, April 2006, 109-2 Joint Committee Print, \* Oct 05 2021**

**Human-Computer Interaction. Interaction Design and Usability Dec 15 2019**

Here is the first of a four-volume set that constitutes the refereed proceedings of the 12th International Conference on Human-Computer Interaction, HCII 2007, held in Beijing, China, jointly with eight other thematically similar conferences. It covers interaction design: theoretical issues, methods, techniques and practice; usability and evaluation methods and tools; understanding users and contexts of use; and models and patterns in HCI.

***Educational Technology in Practice* May 20 2020** The field of educational technology is one that requires a high level of problem solving critical thinking, and interpersonal skills to solve problems that are often complex and multi-dimensional. Analyzing cases provides an opportunity to explore professional issues through an environment that allows action researchers, practitioners and students to analyze and reflect on relevant theories and techniques to understand a real problem, ponder solutions and consequences, and develop responses. Hence, this book seeks to provide relevant authentic and realistic cases for such exploration. This book is guided by the premise that the cases presented will serve as a platform for researchers, practitioners and students to share experiences and best practices in both developing and developed contexts, in an endeavor to bridge the knowledge divide. Throughout the book, various challenges are addressed and educational technology tools and

strategies are subsequently employed in an effort to minimize the issues. Notwithstanding, the book also highlights successes and accomplishments in areas and contexts in which educational technology is being harnessed, including reaching more learners, providing more affordable options, and building capacity. Because of the interdisciplinary and multidisciplinary nature of the field and the cases, this book is useful not only in educational technology, but also in other fields. A “Facilitator Guide” is provided for each chapter for educators with their learners.

**Cases on Successful E-Learning Practices in the Developed and Developing World: Methods for the Global Information Economy** Sep 16 2022 **Cases on Successful E-Learning Practices in the Developed and Developing World: Methods for the Global Information Economy** provides eclectic accounts of case studies in different contexts of e-learning.

**CALL Design: Principles and Practice - Proceedings of the 2014 EUROCALL Conference, Groningen, The Netherlands** Mar 10 2022 **Proceedings of the 2014 EUROCALL Conference, which was held from the 20th to the 23rd of August 2014 at the University of Groningen, The Netherlands.**

***Training and Assessment - Theory and Practice*** Feb 21 2023 **Training and Assessment - Theory and Practice, 1e** covers all core units and essential elective units of TAE40116 Certificate IV in Training and Assessment. It takes both theoretical and pragmatic approaches to help learners gain essential knowledge and skills through solid and well-researched theories by respected authors. Each chapter is a self-contained unit that offers sufficient volume of learning and volume of assessment to support delivery of training and assessment. Designed as part textbook/part workbook, the A4 spiral bound, full-colour format increases student engagement particularly for visual and experiential learners. A customisable premium Assessment Pack can be purchased separately to help institutions design, develop and administer assessments more effectively and efficiently. For more information visit - <https://cengage.com.au/vet/assessments>

**The Profession and Practice of Adult Education** Apr 11 2022 **The Profession and Practice of Adult Education** is a timely book and an excellent introduction to the field. Drawing from an extensive volume of literature, it provides comprehensive coverage and a clear guide. Graduate students will benefit from it and practitioners will be kept abreast of changes that are occurring. —Peter Jarvis, professor of continuing education and senior research professor, University of Surrey, United Kingdom

***Country Reports on Human Rights Practices For 2006, Vol. 1, April 2008, 110-2***  
***Joint Committee Print, S. Prt. 110-40, \* Nov 18 2022***

**Dynamic Advancements in Teaching and Learning Based Technologies: New Concepts** Aug 15 2022 **Dynamic Advancements in Teaching and Learning Based Technologies: New Concepts** explores the technical, social, cultural,

organizational, human, cognitive, and commercial impact of technology. This exciting new publication explores the impact of Web-based technology on the design, implementation and evaluation of the learning and teaching process, as well as the development of new activities, relationships, skills, and competencies for the various actors implied in such processes. It expands on the overall body of knowledge relating to multi-dimensional aspects of Web-based technologies in up to date educational contexts.

**Vietnam and IRRI Jun 20 2020** Policy renewal in agriculture and rice production in Vietnam; Rice research for the 21st century; History of Vietnam-IRRI cooperation; World rice market and Vietnam's agriculture beyond 2000; National programa for Vietnam on food crops reserch and development; Agriculture and environment: toward a sustainable agricultue in Vietnam; Research organization and management: a strategy and a weapon; Vietnam-IRRI collaboration in rice varietal improvement, Sustaining rice productivity in Vietnam through collaborative utilization of genetic diversity in rice; Water and nutrient management; Less-favorable ecosystems; Pest management; Social science; Institution building.

**Vehicle Propulsion Systems Jul 02 2021** The authors of this text have written a comprehensive introduction to the modeling and optimization problems encountered when designing new propulsion systems for passenger cars. It is intended for persons interested in the analysis and optimization of vehicle propulsion systems. Its focus is on the control-oriented mathematical description of the physical processes and on the model-based optimization of the system structure and of the supervisory control algorithms.

**The Chinese State at the Borders Aug 23 2020** The People's Republic of China claims to have 22,000 kilometres of land borders and 18,000 kilometres of coast line. How did this vast country come into being? The state credo describes an ancient process of cultural expansion: border peoples gratefully accept high culture in China and become inalienable parts of the country. And yet, the "centre" had to fight against manifestations of discontent in the border regions, not only to maintain control over the regions themselves, but also to prevent a loss of power at the edges from triggering a general process of regional devolution in the Han Chinese provinces. The essays in this volume look at these issues over a long span of time, questioning whether the process of expansion was a benevolent civilizing mission.

**E-learning History. Evaluating European Experiences May 12 2022**

**Competences in Education for Sustainable Development Sep 04 2021** This volume highlights key moments and movements in this "competence turn" in Education for Sustainable Development (ESD), and explores the different ways in which competences have been conceptualized and implemented. By marshaling a dialogue between chapters and sections, the book provides a coherent whole that will become a key source on ESD competences. The

contributors develop a conceptual map against which to chart existing (and future) ESD competence frameworks, offer new critical case studies that explore the implementation of educator competences in ESD at different structural levels in different European contexts, explore the link between pedagogy and educator competence through hitherto unpublished case studies based on current practices across Europe, and consider the impact of the COVID-19 pandemic on ESD and educator competence. The book comprises 23 chapters divided into four sections, with an introduction and concluding chapter. Section One introduces concepts and models related to ESD competences, while the following two sections focus on implementation and pedagogy. In light of the foregoing material, the shorter Section Four is both reflective and forward looking. The primary audience for this book will be academics and students working in the fields of Education, Sustainability Science and related disciplines.

*Integrating Adult Learning and Technologies for Effective Education: Strategic Approaches* Dec 27 2020 *Integrating Adult Learning and Technologies for Effective Education: Strategic Approaches* provides instructional approaches, relevant theoretical frameworks, and the latest empirical research findings in the area of adult learning and technology.

*Media Controversy: Breakthroughs in Research and Practice* Nov 25 2020 Media is rapidly evolving. From social media to news channels, individuals are being bombarded with headlines, new technologies, and varying opinions.

Consequently, it has become pivotal to develop new approaches for information processing, understanding, and redistributing. *Media Controversy:*

*Breakthroughs in Research and Practice* examines the effect of conflicting opinions and views of news outlets and other mass media outlets on cultures, individuals, and groups. It also examines the role of the internet, mobile phones, and other digital platforms in creating an environment for discussing and sharing the latest controversial news. Highlighting a range of topics such as censorship, media ethics, and media transparency, this publication is an ideal reference source for government officials, leaders, activists, professionals, policymakers, media specialists, academicians, and researchers interested in the various facets of media controversy.

*Innovations in the Design and Application of Alternative Digital Credentials* Nov 06 2021 The world of academic credentials is going through a rapid change that has seen the emergence of alternate digital credentials. Among these are micro-certificates, digital diplomas, and open digital badges, which provide a digital record of learning and have the possibility of not only altering the landscape of academic credentials but also transforming the relationship between institutions of higher education, their learners, and society. As institutions turn their attention to alternate digital credentials, it is important to learn from what others have experienced. *Innovations in the Design and Application of Alternative Digital Credentials* identifies innovative examples of the use of alternate digital

credentials to validate specific skills within an existing academic program or on their own. Alternate digital credentials may be how specific skills (hard or soft) are validated with an emphasis on their relationship to enhance employability and recognition within an industry. Covering a wide range of topics such as micro-credentials, badge-driven learning, and traditional credentials, this handbook is ideal for researchers, students, academicians, and administrative decision makers, as well as those who support and finance learning systems and theories and those already involved in the design and application of alternate digital credentials at the post-secondary level.

**ECEL2009- 8th European Conference on E-Learning, Feb 26 2021**

**Practice and Innovations in Sustainable Transport Jun 01 2021** The book continues with an experimental analysis conducted to obtain accurate and complete information about electric vehicles in different traffic situations and road conditions. For the experimental analysis in this study, three different electric vehicles from the Edinburgh College leasing program were equipped and tracked to obtain over 50 GPS and energy consumption data for short distance journeys in the Edinburgh area and long-range tests between Edinburgh and Bristol. In the following section, an adaptive and robust square root cubature Kalman filter based on variational Bayesian approximation and Huber's M-estimation is proposed to accurately estimate state of charge (SOC), which is vital for safe operation and efficient management of lithium-ion batteries. A coupled-inductor DC-DC converter with a high voltage gain is proposed in the following section to match the voltage of a fuel cell stack to a DC link bus. Finally, the book presents a review of the different approaches that have been proposed by various authors to mitigate the impact of electric buses and electric taxis on the future smart grid.

**Global Strategy and Practice of E-Governance: Examples from Around the World Jul 22 2020** Over the past decade, there has been continual development and renewal of strategies and practices surrounding e-governance. Governments around the world have embraced new information and communication technologies to increase the efficiency of internal processes, deliver better and more integrated services to citizens and businesses, invite citizen and stakeholder participation in planning decisions, improve communication, and sometimes even enhance democratic processes. **Global Strategy and Practice of E-Governance: Examples from Around the World** provides readers with an overview of relevant strategy and policy-level theoretical frameworks and examples, as well as up-to-date implementations from around the world. This book offers valuable insights into best practices, as well as some of the issues and challenges surrounding the governance of and with information and communication technologies in a globalized, knowledge-based world.

**Orthodox Christianity and the Politics of Transition Mar 30 2021** This book

**discusses in detail how Orthodox Christianity was involved in and influenced political transition in Ukraine, Serbia, and Georgia after the collapse of communism. Based on original research, including extensive interviews with clergy and parishioners as well as historical, legal, and policy analysis, the book argues that the nature of the involvement of churches in post-communist politics depended on whether the interests of the church (for example, in education, the legal system or economic activity) were accommodated or threatened: if accommodated, churches confined themselves to the sacred domain; if threatened, they engaged in daily politics. If churches competed with each other for organizational interests, they evoked the support of nationalism while remaining within the religious domain.**

**Safe and Secure Transport and Storage of Radioactive Materials Nov 13 2019**  
**Safe and Secure Transport and Storage of Radioactive Materials reviews best practice and emerging techniques in this area. The transport of radioactive materials is an essential operation in the nuclear industry, without which the generation of nuclear power would not be possible. Radioactive materials also often need to be stored pending use, treatment, or disposal. Given the nature of radioactive materials, it is paramount that transport and storage methods are both safe and secure. A vital guide for managers and general managers in the nuclear power and transport industries, this book covers topics including package design, safety, security, mechanical performance, radiation protection and shielding, thermal performance, uranium ore, fresh fuel, uranium hexafluoride, MOX, plutonium, and more. Uniquely comprehensive and systematic coverage of the packaging, transport, and storage of radioactive materials**  
**Section devoted to spent nuclear fuels**  
**Expert team of authors and editors**

**Annual Report, International Religious Freedom Jan 08 2022**

**HCI International 2020 - Late Breaking Papers: User Experience Design and Case Studies Jul 14 2022**  
**This book constitutes late breaking papers from the 22nd International Conference on Human-Computer Interaction, HCII 2020, which was held in July 2020. The conference was planned to take place in Copenhagen, Denmark, but had to change to a virtual conference mode due to the COVID-19 pandemic. From a total of 6326 submissions, a total of 1439 papers and 238 posters have been accepted for publication in the HCII 2020 proceedings before the conference took place. In addition, a total of 333 papers and 144 posters are included in the volumes of the proceedings published after the conference as “Late Breaking Work” (papers and posters). These contributions address the latest research and development efforts in the field and highlight the human aspects of design and use of computing systems. The 54 late breaking papers presented in this volume were organized in two topical sections named: User Experience Design and Evaluation Methods and Tools; Design Case Studies; User Experience Case Studies.**
