The nEU-Med project: Vetricella, an Early Medieval royal property on Tuscany's Mediterranean Apr 30 2021 The nEU-Med project is part of the Horizon 2020 programme, in the ERC Advanced project category. It began in October 2015 and the University of Siena is the host institution of the project. The project is focussed upon two Tuscan riverine corridors leading from the Gulf of Follonica in the Tyrrhenian Sea to the Colline Metallifere. It aims to document and analyze the form and timeframe of economic growth in this part of the Mediterranean, which took place between the 7th and the 12thc. Central to this is an understanding of the processes of change in human settlements, in the natural and farming landscapes in relation to the exploitation of resources, and in the implementation of differing political strategies. This volume presents the multi-disciplinary research focussed upon the key site of the project, Vetricella, and its territory. Vetricella is thought to be the site of Valli, a royal property in the Tuscan march. It is the only Early Medieval property to be extensively studied in Italy. Located on Italy's Tyrrhenian coast, the archaeology and history of this site provide new insights on estate management, metal production and wider Mediterranean relations in the later first millennium. Apart from reports on the archaeology, the finds from excavations and environmental studies, three essays consider the wider European historical and archaeological context of Vetricella. Future monographs will feature studies by members of the project team on aspects of Vetricella, its finds and territory.

*L'Analisi Linguistica e Letteraria 2015-1* Feb 21 2023 L'Analisi Linguistica e Letteraria è una rivista internazionale di linguistica e letteratura peer reviewed. Ha una prospettiva sia sincronica che diacronica e accoglie ricerche di natura teorica e applicata. Seguendo un orientamento spiccatamente interdisciplinare, si propone di approfondire la comprensione dei processi di analisi testuale in ambito letterario come anche in ambito linguistico. La rivista è organizzata in tre sezioni: la prima contiene saggi e articoli; la seconda presenta discussioni e analisi d'opera relative alle scienze linguistiche e letterarie; la terza sezione ospita recensioni e una rassegna di brevi schede bibliografiche riguardanti la linguistica generale e le linguistiche delle singole lingue (francese, inglese, russo, tedesco). La rivista pubblica regolarmente articoli in francese, inglese, italiano e tedesco, e occasionalmente anche in altre lingue: nel 2010, ad esempio, ha pubblicato un volume tematico interamente in russo.

**Brill's Companion to Ovid** Feb 15 2020 This collection of essays on Ovid's life, works, and influence is intended to serve as a vade-mecum for all interested in the Roman World's most versatile literary genius. The broad range of subjects and perspectives represented by the Companion's fourteen contributors offers readers the best in contemporary classical scholarship.

**Papers in Italian Archaeology VII: The Archaeology of Death** Sep 04 2021 This volume collects more than 60 papers by contributors from the British Isles, Italy and other parts of continental Europe, and North and South America, focussing on recent developments in Italian archaeology from the Neolithic to the modern period.

**Principi tecnici ed economici per l'analisi del mercato delle piattaforme software** Dec 27 2020 To understand the strategies governing competition in the market for software platforms, it is necessary to consider three distinct but interconnected fields: technological, economic and legal. The first part of this paper is devoted to the synthetic description of some indispensable technical principles. Then I'll describe some relevant economic issues, focusing on the relationship between a quasi-monopoly controlling a software platform and the producers of complementary software. Antitrust cases concerning Microsoft will provide several examples. In the second part of the paper, the basic technical and legal tools will be used to contextualize the recent

(March 2004) Decision of the European Commission concerning Microsoft. My analysis will try to demonstrate that this Decision is coherent with both the basic economics of software markets and previous decisions concerning Microsoft Cases taken by US authorities (despite the critical attitude of the US administration with respect to the Decision of the Commission): Moreover, I'll argue that American and European measures concerning Microsoft are actually complementary. The last part of the paper concludes signalling an inconsistency between the technical/economic field and the legal one. In particular, since copyright protection of software is considered to be quite weak (as it is, indeed) legal systems have a tendency to "compensate"; this weakness reinforcing industrial secret and limiting decompilation (reverse engineering of software): this approach has a severe side effect in reinforcing the already strong position of platform controllers (and -at the same time- it doesn't seem to be particularly helpful in reinforcing copyright as a legal tool to protect investments made in other fields of the software industry).

**Defining the Spatial Scale in Modern Regional Analysis** Nov 06 2021 This book explores different approaches to defining the concept of region depending on the specific question that needs to be answered. While the typical administrative spatial data division fits certain research questions well, in many cases, defining regions in a different way is fundamental in order to obtain significant empirical evidence. The book is divided into three parts: The first part is dedicated to a methodological discussion of the concept of region and the different potential approaches from different perspectives. The problem of having sufficient information to define different regional units is always present. This justifies the second part of the book, which focuses on the techniques of ecological inference applied to estimating disaggregated data from observable aggregates. Finally, the book closes by presenting several applications that are in line with the functional areas definition in regional analysis.

**Investigating Gender, Translation and Culture in Italian Studies** Feb 26 2021 The past few years have witnessed a growing academic interest in Italian Studies and an increasing number of symposia and scholarly activities. This volume originates from the Society for Italian Studies Postgraduate Colloquia that took place at the University of Leicester and Cambridge in June 2004 and April 2005 respectively. It gathers together articles by young researchers working on various aspects of Italian Studies. It well illustrates current trends in both typical areas of research, like literature and 'high culture', and in those which have gained momentum in recent years, like translation and language studies. The volume offers a taste of the dynamic outlook of current research in Italian Studies: the interdisciplinary approach of the essays in translation and gender studies, and the innovative methodological perspectives and findings offered by the new fields of Italian L2 and ethnography. The book is divided into three sections, each grouping contributions by broad subject areas: literature and culture, translation and gender studies, language and linguistics. Cross-fertilizations and interdisciplinary research emerge from several essays and the coherent ensemble constitutes an example of the far-reaching results achieved by current research.

**Freud and Italian Culture** Mar 18 2020 This book explores the different ways in which psychoanalysis has been connected to various fields of Italian culture, such as literary criticism, philosophy and art history, as well as discussing scholars who have used psychoanalytical methods in their work. The areas discussed include: the city of Trieste, in chapters devoted to the author Italo Svevo and the artist Arturo Nathan; psychoanalytic interpretations of women terrorists during the anni di piombo; the relationships between the Freudian concept of the subconscious and language in philosophical research in Italy; and a personal reflection by a practising analyst who passes from literary texts to her own clinical experience. The volume closes with a chapter by Giorgio Pressburger, a writer who uses Freud as his Virgil in a narrative of his descent into a modern hell. The volume contains contributions in both English and Italian.

*ArcheoLogica Data, 1, 2021* Oct 13 2019 ArcheoLogica Data wants to reach an Italian and international audience of scholars, professionals, students, and, more generally, early-career archaeologists, and it accepts contributions written both in Italian and English. ArcheoLogica Data proposes to indissolubly associate data and interpretation. It embraces that global idea of archaeological data that integrates all the discipline declinations without any thematic or chronological constraints. Data is at the centre, and around lies everything that can stem from it: interpretations, hypotheses, reconstructions, applications, theoretical and methodological reflections, critical ideas, constructive discussions.

*Structural Analysis of Historical Constructions - 2 Volume Set* Oct 17 2022 Structural Analysis of Historical Constructions contains about 160 papers that were presented at the IV International Seminar on Structural Analysis of Historical Constructions that was held from 10 to 13 November, 2004 in Padova Italy. Following publications of previous seminars that were organized in Barcelona, Spain (1995 and 1998) and Guimarães, Portugal (2001), state-of-the-art information is presented in these two volumes on the preservation, protection, and restoration of historical constructions, both comprising monumental structures and complete city centers. These two proceedings volumes are devoted to the possibilities of numerical and experimental techniques in the maintenance of historical structures. In this respect, the papers, originating from over 30 countries, are subdivided in the following areas: Historical aspects and general methodology, Materials and laboratory testing, Non-destructive testing and inspection techniques, Dynamic behavior and structural monitoring, Analytical and numerical approaches, Consolidation and strengthening techniques, Historical timber and metal structures, Seismic analysis and vulnerability assessment, Seismic strengthening and innovative systems, Case studies. Structural Analysis of Historical Constructions is a valuable source of information for scientists and practitioners working on structure-related issues of historical constructions

*Il campione per l'analisi chimica* May 12 2022 Questo volume illustra le principali tecniche di preparazione del campione con particolare enfasi sulle tecniche innovative e sui sistemi on-line che mirano a ridurre il tempo di analisi, la manipolazione del campione e il consumo di solventi. L'analisi chimica prevede infatti generalmente una fase di preparazione del campione, che ha lo scopo di isolare gli analiti di interesse dalla matrice ed eliminare i potenziali interferenti prima della determinazione analitica finale. Il testo è arricchito da numerosi esempi applicativi nel settore dell'analisi chimica degli alimenti e in particolare dei contaminanti. Il volume è rivolto, oltre che a studenti universitari, dottorandi e ricercatori, anche ai tecnici di laboratorio che devono acquisire conoscenze e competenze per la preparazione del campione per l'analisi chimica nel settore alimentare, ambientale e farmaceutico.

**Rhetorical Analysis** Jul 14 2022 The analysis of biblical rhetoric has been developed only in the last 250 years. The first half of this book outlines the history of the method known as rhetorical analysis in biblical studies, illustrated by numerous texts. The work of Lowth (who focused on 'parallelism'), Bengel (who drew attention to 'chiasmus'), Jebb and Boys (the method's real founders at the turn of the nineteenth century) and Lund (the chief exponent in the mid-twentieth century) are all discussed, as is the current full blooming of rhetorical analysis. The second half of the book is a systematic account of the method, testing it on Psalms 113 and 146, on the first two chapters of Amos, and many other texts, especially from Luke. Translated by Luc Racaut.

*Structural Analysis of Historical Constructions: Anamnesis, Diagnosis, Therapy, Controls* Jul 02 2021 Structural Analysis of Historical Constructions. Anamnesis, diagnosis, therapy, controls contains the papers presented at the 10th International Conference on Structural Analysis of Historical Constructions (SAHC2016, Leuven, Belgium, 13-15 September 2016). The

main theme of the book is “Anamnesis, Diagnosis, Therapy, Controls”, which emphasizes the importance of all steps of a restoration process in order to obtain a thorough understanding of the structural behaviour of built cultural heritage. The contributions cover every aspect of the structural analysis of historical constructions, such as material characterization, structural modelling, static and dynamic monitoring, non-destructive techniques for on-site investigation, seismic behaviour, rehabilitation, traditional and innovative repair techniques, and case studies. A special focus has been put on six specific themes: - Innovation and heritage - Preventive conservation - Computational strategies for heritage structures - Sustainable strengthening of masonry with composites - Values and sustainability, and - Subsoil interaction The knowledge, insights and ideas in Structural Analysis of Historical Constructions. Anamnesis, diagnosis, therapy, controls make this book of abstracts and the corresponding, digital full-colour conference proceedings containing the full papers must-have literature for researchers and practitioners involved in the structural analysis of historical constructions.

**Effectiveness of University Education in Italy** Nov 25 2020 In this volume – drawn on experience at Italian universities – the authors infer upon the quality of the education achieved by graduates by surveying their transition to work and further professional paths. Papers are presented on the effectiveness of university education, on employability of graduates, with a discussion on considering the employment rate as the main assessment indicator, on competence analysis for backward assessment purposes and finally on university human capital indicators.

*Frattura ed Integrità Strutturale: Annals 2009* Jun 13 2022 Annals of the Italian Group of Fracture journal "Frattura ed Integrità Strutturale" (issues 7 - 10, 2009)

*Archeologia e Calcolatori, 32.1, 2021* Mar 30 2021 Il volume 32.1 è suddiviso in due parti. La prima comprende gli articoli proposti annualmente alla rivista da studiosi italiani e stranieri che illustrano ricerche archeologiche interdisciplinari in cui l'uso delle tecnologie informatiche risulta determinante per l'acquisizione, l'elaborazione e l'interpretazione dei dati. Tecniche di analisi statistica, banche dati, GIS e analisi spaziali, tecniche di rilievo tridimensionale e ricostruzioni virtuali, sistemi multimediali, contribuiscono a documentare le testimonianze del passato e a diffondere i risultati della ricerca scientifica. La seconda parte del volume contiene un inserto speciale curato da Angela Bellia e dedicato a una tematica innovativa, l'archeomusicologia, un campo di ricerca multidisciplinare che adotta i metodi dell'archeologia per lo studio della musica e della vita musicale nel mondo antico. Gli articoli s'incentrano sul ruolo delle tecnologie digitali basate sulla modellazione 3D e sulla simulazione del suono per ampliare le conoscenze sugli strumenti musicali dell'antichità e sul prezioso, ma estremamente labile, patrimonio sonoro. Chiude il volume la sezione dedicata alle Note e recensioni.
